FDD SERIES

DIRECT DRAW BEER COOLERS

SPECIFICATIONS

Construction: Heavy duty stainless steel top, 18 gauge. Painted black front, sides and back. (S) Model's have stainless steel front, sides and back. Interior constructed of heavy duty galvanized steel walls with covered corner stainless steel floor. Floor has a reinforced and removable false beveled panel for added protection. No gap inbetween equipment for side by side installation.

Door is comprised of a heavy duty black painted steel. (S) Models are stainless steel. Provided with locks per door, magnetic door gaskets, removable without tools. Door openings have a plastic breaker strips to retard condensate formation.

Unit comes complete with a 1-1/2" CFC-Free polyurethane insulation, foamed in place.

Refrigeration system: Self contained capillary tube system using environmentally friendly (CFC Free) R-134a refrigerant. Front breathing compressor on left side.

Evaporator coil is mounted to interior top panel encased in stainless steel. Large fan motor and fan blades for greater air flow. Automatic condensate evaporator, no drain connection required: evaporator condensate has been plumbed to a condensate pan located in the compressor housing.

Rear drain connection for the drip pan located in the rear of the compressor housing.

3" diameter polished stainless steel draft towers cooled by continuous cold air circulation. Channel air distribution system.

Access for the condensing unit behind the front grill, slides out for easy cleaning and maintenance.

Cabinets are designed to maintain temperatures between 33° F to 38° F in the interior cabinet.

Lights: Interior fluorescent light (except FDD-24).

Others: Unit is supplied standard with a 8' cord and plug (Nema 5-15p).

Warranty: One year labor and parts warranty. 5 year compressor warranty (Continental U.S.A. & Canada only).
