¹To prove this our engineers test for pick up performance across carpets (ASTM F608), hard floors (ASTM F2607) and hard floors with crevices (IEC 60312-1 5.2). To mimic actual use, they load machines with dust before testing (IEC 60312-1 5.9).

²Tested against upright market, dust loaded, using ASTM F608, ASTM F2607, IEC 60312-1 5.2, 5.9. Based on competitor NPD unit sales data, MAT April 2014.

³Trigger grip releases instantly, meaning battery power is only used for vacuuming, allowing for a longer cleaning session. On when you need it, off when you don't.
